

## VMware Infrastructure 3

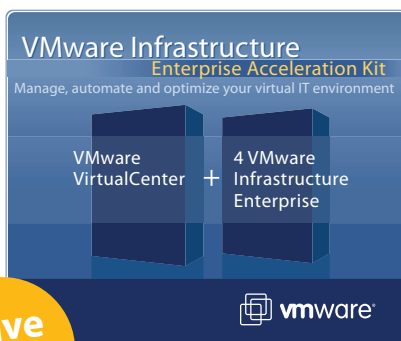

Data Center Management and Optimization Suite

# take advantage of Limited Time Promotions on select VMware VI3 Bundles

### VMware Infrastructure 3 Overview

The VMware Infrastructure allows businesses to optimize their existing IT investments while providing enterprise-class benefits of virtualization such as disaster recovery, high availability, simplified IT management and reduced energy costs. Deploying virtualization translates into better service levels, and enables customers to spend less on IT and reinvest these savings into their businesses. This VMware Infrastructure bundled packaging delivers the features, functionality and training that enable companies to rapidly experience the value of a virtual infrastructure. New features in VMware Infrastructure deliver benefits such as decreased power consumption, automated tracking and patching of virtual infrastructure, and increased infrastructure availability.

### VMware Infrastructure Enterprise Acceleration Kit

#### Enterprise-Class Virtualization with Scalable Management for Growing IT Environments

Includes four-host license (two processor each host) of VMware Infrastructure Enterprise, along with VirtualCenter Server for unlimited management of your virtualized environment. This kit is an ideal option for businesses that want to deploy a larger solution or are planning for future growth. MSRP is USD \$25,195 **PROMO PRICE is \$23,235**

VMware Part # VI-AK-PROMO

\*Valid for purchases through April 30, 2009. Only one VI Acceleration Kit may be purchased per customer.
