

Emulex[®] Drivers for ESXi 7.0

Release 14.0.326.12

Purpose and Contact Information

These release notes describe the new feature components, supported adapters, change history, resolved issues, known issues/limitations with the current release, supported upgrade versions, and related KB-articles associated with this release of the Emulex[®] drivers for ESXi 7.0.

For the latest product documentation, go to www.broadcom.com. If you have questions or require additional information, contact an authorized Broadcom[®] Technical Support representative at ecd-tech.support@broadcom.com.

New Features Components

- Discontinued support for LPe12000-series, LPe15000-series, and LPe16000-series adapters.
- Introduced the `lpfc_fcp_wait_abts_rsp` driver parameter to enable or disable quick abort behavior.
- Added support for the VMware ESXi 7.0 U3 operating system.
- Integrated the `lpfc` driver with the `nvme` transport driver.
- Discontinued support for the ESXi 6.5 operating system.

Supported Adapters

The following HBAs are supported by the ESXi 7.0:

- LPe31000-series adapters
- LPe32000-series adapters
- LPe35000-series adapters
- LPe36000-series adapters

Change History

There are no changes to the driver in this release.

Resolved Issues

There are no resolved issues in this release.

Known Issues/Limitations with the Current Release

When the VMware Quick Boot feature is enabled, configuration changes to Emulex firmware features like trunking and WWN management do not get activated after a reboot.

Workaround

Activate the configuration changes to Emulex firmware features by rebooting the system using the `reboot -f` command.

Supported Upgrade Versions

There are no specific upgrade restrictions for moving from in-box to out-of-box.

Related KB-Articles

There are no related KB-articles in this release.
